## Welcome

Thank you so much for joining us and continuing this journey as we navigate our way through a new normal in which conversations around digital pedagogy are ever more important. Below is a schedule of this institute. The institute includes a combination of synchronous sessions, where we all work together on a zoom call, or asynchronous sessions, to be done on your own time and at your own pace. We've done this to help limit Zoom fatigue and allow for individual exploration. We also ask that if you have any "aha" moments, recommendations, great quotes, challenges, or fun screenshots, to feel free to put them in our [Observed @ Thinking Digitally Summer Institute](#). While unfortunately we are not all together and are unable to have those sharing spaces through our lunchtimes or breaks, we want to emulate that spirit of collaboration as much as possible while apart.

### To Do

Nothing for now

After we finish the Institute, please fill out our survey so we can learn from your experience.

## Asynchronous Modules

We have emailed you individual, recommended pathways through the modules based on the information you have given us. You can opt to follow it this pathway or forge your own, with the exception of the Accessibility module, which is required for all participants. Modules will require different lengths of time to complete. All modules will be loaded to Canvas at the start of the Institute and will remain available to faculty throughout the summer.
